1. Introduction

1.1. Audience

This document is intended for Skills Funding Agency, the National Careers Service, consumers of the public API - technical architects and developers.

1.2. Introduction to the Skills Funding Agency and Course Information

The Skills Funding Agency (SFA) fund various institutions to provide training and learning opportunities. The funded opportunities and courses are held in a database to allow these courses to be searched for and information obtained about them.

The Course Directory is the course and training data that is held and made available to third parties via APIs and CSV downloads from data.gov.uk and the portal for learning providers to manage their own data.

1.3. Search API Performance & Data Currency

The public search API operates over the internet. This means that there are no guarantees of service QoS on the supply of data from the public search API. We take steps to maximise performance and availability, one of which is to make the data available in CSV from both on the course directory provider portal (biweekly update), and on data.gov.uk (monthly update).

The API data is updated overnight and will therefore not include any data added today.

All Ids within the system are subject to change. For example, the Id for a given course is not guaranteed to be the same from day to day. It is therefore advisable that you do not store Ids locally for future calls to the API. As data is populated nightly Ids will remain the same during any given day.

1.4. Endpoints

The endpoint for the test site is

<https://opendatatest.coursedirectoryproviderportal.org.uk/CourseSearchService.svc> and the endpoint for the live site is <https://opendata.coursedirectoryproviderportal.org.uk/CourseSearchService.svc>.

1.5. Sample Code

We have published sample code in several languages. This code is supplied “as is” with no warranty. It is intended purely to show how to consume the API from various languages and does not constitute best-practice methods.

You can download the sample code from <https://coursedirectoryproviderportal.org.uk/Help/CourseDirectoryAPI>.

2. Consuming the API

2.1. Obtaining an API Key

In order to consume the API you must first obtain an API key. All calls to the API must include your API key. Any calls that do not include a valid API key will return 0 results.

Please note that the test and live environments use different keys so your API key for the test environment will not work on the live environment and vice versa.

2.2. Test System Access Request

Please use the [API Test System Access Request](#) form to request access to the test API.

Include details such as introduction to your company and products, and benefits for the users of the proposed service.

If you need help with the API of completing the access request please contact support.

Tel. 0844 811 5073 or

Email: support@coursedirectoryproviderportal.org.uk.

2.3. Data Consumer – Design Approval

Please use the [Data Consumer – Design Approval and access to the live API](#) form to request access to the live API.

Please provide flow diagram(s) to illustrate your solutions use of the API interface(s) detailing which interface and which method/call has been used at each stage.

How frequently this data is read?

How is the data processed?

The API methods used.

3. API Overview & Methods

APIs allow searching against the directory, these APIs provide lookup and other data as well as performing the search and returning the results. The data for the API is refreshed overnight.

Directory consumers of the data, use these APIs to perform searches against the course directory.

The APIs take the form of a web-service (SOAP).

The API is designed to work as a call on request service and therefore there is no option within the API to download data in bulk. If you would rather store the data and make requests against your own local database there is an open data CSV file that is published twice per week (every Monday and Thursday). You can download the open data CSV file from <https://coursedirectoryproviderportal.org.uk/OpenData>. The files are consistently named so it should be trivial to automate the downloading of this file.

3.1. Course Search (CourseList)

The CourseList method performs a search against courses in the provider portal. This method takes a [CourseListInput](#) object and returns a [CourseListOutput](#) object as its response.

The results are paged and you specify how many results per page you would like to return and the page number you would like to be returned.

The SOAP action for this method is urn:CourseListOperation.

3.1.1. Complex Search Terms

The API allows complex search terms to be used. By default, the API will return courses including synonyms of the search terms supplied. For example, a search for **Maths** will include courses with **Mathematics**, **Algebra**, **Statistics** etc. If you are looking for a course specifically including the word maths you can surround the search term with double quotes ("**Maths**"). The API will then look specifically for courses containing the word maths and will not return courses with mathematics, algebra or statistics (unless they also include the specific word Maths).

You can also provide "exclude" words in the search. To provide an exclude word prefix the word with a minus sign. For example, **Maths -"Algebra"** will return course containing the word maths (or any of its synonyms) but will exclude any courses containing the word algebra.

3.2. Course Detail (CourseDetail)

The CourseDetail method returns information about a specific course (or multiple specific courses). It takes a [CourseDetailInput](#) object and returns a [CourseDetailOutput](#) object.

The SOAP action for this method is urn:CourseDetailOperation.

3.3. Provider Search (ProviderSearch)

The ProviderSearch method performs a search against the providers in the provider portal. It takes a [ProviderSearchInput](#) object and returns a [ProviderSearchOutput](#) object.

The SOAP action for this method is urn:ProviderSearchOperation.

3.4. Provider Detail (ProviderDetail)

The ProviderDetail method returns information about a specific provider. It takes a [ProviderDetailsInput](#) object and returns a [ProviderDetailsOutput](#) object.

The SOAP action for this method is urn:ProviderDetailsOperation.

3.5. Subject Browse (GetCategories)

The GetCategories method returns a hierarchical list of course subjects based on the learndirect Classification System. It allows you to present a list of subjects which can then be drilled down. You can then use the CourseList method to find all the courses in a specific category by using the LDCS property of the [CourseListRequestStructure](#) object.

The GetCategories method takes a [SubjectBrowseInput](#) object and returns a [SubjectBrowseOutput](#) object.

The SOAP action for this method is urn:CourseBrowse.

4. Request (Input) Types

4.1. CourseListInput

Name	Type	Mandatory	Default Value	Notes
CourseListRequest	CourseListRequestStructure	Y		

4.2. CourseListRequestStructure

Name	Type	Mandatory	Default Value	Notes
CourseSearchCriteria	SearchCriteriaStructure	Y		
SortBy	String	Y		One of: A – Relevance D – Distance S – Start Date
PageNo	Integer	Y		Page number to return
RecordsPerPage	Integer	N	10	Number of records to return per page

4.3. SearchCriteriaStructure

Name	Type	Mandatory	Default Value	Notes
APIKey	String	Y		You must obtain an API key before you can use the search API
SubjectKeyword	String	Y		The search string
DFE1619Funded	String	N	Blank	One of: Y – Return only courses aimed at 16-19 year olds N – Return only courses not aimed at 16-19 year olds

			Blank – Return all courses
Location	String	N	The town or postcode
Distance	Float	N	Return courses within x miles from the location
ProviderID	Integer	N	The Id of the provider if searching for courses provided by a specific provider
ProviderKeyword	String	N	Search text for the provider
LDCS	Array of Strings	N	Array of Learn Direct Classification System codes. Courses with any of the supplied LDCS codes will be returned.
QualificationTypes	Array of Strings	N	Array of qualification types. Courses with any of the qualification types supplied will be returned. For a list of valid codes see Qualification Types .
QualificationLevels	Array of Strings	N	Array of qualification levels. Courses with any of the qualification levels supplied will be returned. For a list of valid codes see Qualification Levels .
StudyModes	Array of Strings	N	Array of study modes. Courses with any of the study modes supplied will be returned. For a list of valid codes see Study Modes
AttendanceModes	Array of Strings	N	Array of attendance modes. Courses with any of the attendance modes supplied will be returned. For a list of valid codes see Attendance Modes
AttendancePatterns	Array of Strings	N	Array of attendance patterns. Courses with any of the attendance patterns supplied will be returned. For a list of valid codes see Attendance Patterns
A10Codes	Array of Strings	N	Array of A10 funding Codes. courses with any of the A10 funding codes supplied will be returned. For a list of valid codes see A10 Funding Codes
EarliestStartDate	Date	N	By default, any course with a start date greater than 1 year ago will be included in the search results. Set this to a date in the format YYYY-MM-DD to change the earliest start date. Dates prior to 1 year ago will always be ignored.
TTGFlag	String	N	This field is no longer used.
TQSFlag	String	N	This field is no longer used.
IESFlag	String	N	This field is no longer used.
FlexStartFlag	String	N	Flexible start flag.
			Y = Flexible start date
OppsAppClosedFlag	Date	N	If this field is supplied it should be set to a date in the format YYYY-MM-DD. When set, only courses with a “Apply Until” date prior to the date supplied will be returned.
ERAppStatus	Array of Strings	N	This field is no longer used.
ERTtgStatus	Array of Strings	N	24+ loans.
			Y = Return only courses from providers who offer 24+ loans.
AdultLRStatus	Array of Strings	N	This field is no longer used.

OtherFundingStatus	Array of Strings	N	This field is no longer used.
SFLFlag	String	N	This field is no longer used.
ILSFlag	String	N	This field is no longer used.

4.4. ProviderSearchInput

Name	Type	Mandatory	Default Value	Notes
ProviderSearchRequest	ProviderSearchRequestStructure	Y		

4.5. ProviderSearchRequestStructure

Name	Type	Mandatory	Default Value	Notes
APIKey	String	Y		You must obtain an API key before you can use the search API
ProviderKeyword	String	N		The keyword(s) to search for

4.6. ProviderDetailsInput

Name	Type	Mandatory	Default Value	Notes
APIKey	String	Y		You must obtain an API key before you can use the search API
ProviderID	Integer	Y		The ID of the provider you want to return

4.7. CourseDetailInput

Name	Type	Mandatory	Default Value	Notes
APIKey	String	Y		You must obtain an API key before you can use the search API

CourseID	Array of Integers	Y	The IDs of the course(s) you want to return
----------	-------------------	---	---

4.8. SubjectBrowseInput

Name	Type	Mandatory	Default Value	Notes
APIKey	String	Y		You must obtain an API key before you can use the search API

5. Response (Output) Types

5.1. CourseListOutput

Name	Type	Notes
CourseListResponse	CourseListResponseStructure	

5.2. CourseListResponseStructure

Name	Type	Notes
ResultInfo	ResultInfoType	
CourseDetails	CourseStructure	There will be one of these per course
RequestDetails	CourseListRequestStructure	
MatchingLDCS	Array of CourseListResponseStructureMatchingLDCS	This field is no longer used and will not be present in the response

5.3. ResultInfoType

Name	Type	Notes
NoOfPages	Integer	Total number of pages in result set
NoOfRecords	Integer	Total number of records in result set
PageNo	Integer	Current page number

5.4. CourseStructure

Name	Type	Notes
Provider	Array of ProviderInfo	

Course	CourseInfo
Opportunity	OpportunityInfo

5.5. ProviderInfo

Name	Type	Notes
ProviderID	Integer	Unique Id of the provider
ProviderName	String	Name of the provider
UKPRN	Integer	UKPRN of the provider
UPIN	Integer	Provider's UPIN
TFPlusLoans	Boolean	Does this provider offer 24+ loans?
DFE1619Funded	Boolean	Does this provider offer courses aimed at 16-19 year olds?
FEChoices_LearnerDestination	Double	Provider's FE Choices score for learner destination (out of 10)
FEChoices_LearnerSatisfaction	Double	Provider's FE Choices score for learner satisfaction (out of 10)
FEChoices_EmployerSatisfaction	Double	Provider's FE Choices score for employer satisfaction (out of 10)

5.6. CourseInfo

Name	Type	Notes
CourseID	Integer	Unique Id of the course
CourseTitle	String	Course title
QualificationType	String	Qualification type. Returns the description from the list of Qualification Types
QualificationLevel	String	Qualification level. Returns the description from the list of Qualification Levels
LDCS	Array of LDCSOutputType	Learn direct classification codes
NoOfOpps	Integer	Number of opportunities for this course
CourseSummary	String	Course summary

5.7. OpportunityInfo

Name	Type	Notes
OpportunityId	Integer	Unique Id of the opportunity
StudyMode	String	Description of study mode. See Study Modes .
AttendanceMode	String	Description of attendance mode. See Attendance Modes .
AttendancePattern	String	Description of attendance pattern. See Attendance Patterns .
DFE1619Funded	Boolean	True = Course is aimed at 16-19 year olds False = Course is not aimed at 16-19 year olds
StartDate	StartDateType	Start date for the opportunity. This contains the earliest start date for this opportunity on or after the EarliestStartDate parameter specified or 1 year ago if EarliestStartDate is not specified.
EndDate	Date	End date of the opportunity in the format DD MMMM YYYY (e.g. 01 September 2017)
Venue	VenueInfo	The venue of the opportunity.
Region	String	The region of the opportunity. Either Venue or Region will be populated but not both.
Duration	DurationType	The duration of the opportunity

5.8. StartDateType

Name	Type	Notes
Item	Date	Start date of the opportunity in the format DD MMMM YYYY (e.g. 01 September 2017)
ItemElementName	String	Date DateDesc

5.9. VenueInfo

Name	Type	Notes
VenueName	String	The name of the venue
Distance	Double	Distance of the venue from the location passed. Only populated if the location passed is a recognised postcode.
VenueAddress	AddressType	

5.10.AddressType

Name	Type	Notes
Address_Line_1	String	Line 1 of the address
Address_Line_2	String	Line 2 of the address
Town	String	
County	String	
Postcode	String	
Latitude	Double	
Longitude	Double	

5.11.DurationType

Name	Type	Notes
DurationValue	Double	The length of the course
DurationUnit	String	Description of the unit of the duration. See Duration Units
DurationDescription	String	Full description of the duration. E.g. "21 Week(s)"

5.12.CourseListResponseStructureMatchingLDCS

Name	Type	Notes
LDCS	Array of LDCSInfoType	
Counts	Integer	

5.13.LDCSOutputType

Name	Type	Notes
CatCode1	LDCSInfoType	First learn direct classification code
CatCode2	LDCSInfoType	Second learn direct classification code
CatCode3	LDCSInfoType	Third learn direct classification code
CatCode4	LDCSInfoType	Fourth learn direct classification code

CatCode5	<u>LDCSInfoType</u>	Fifth learn direct classification code
----------	---------------------	--

5.14.LDCSInfoType

Name	Type	Notes
LDCSCode	String	Learn Direct Classification System code
LDCSDesc	String	Learn Direct Classification System description
Searchable	String	Yes = Will appear in the Categories function call

5.15.ProviderSearchOutput

Name	Type	Notes
ProviderSearchResponse	<u>ProviderSearchResponseStructure</u>	

5.16.ProviderSearchResponseStructure

Name	Type	Notes
ProviderDetails	ProviderStructure	This will appear once per provider
RequestDetails	<u>ProviderSearchRequestStructure</u>	

5.17.ProviderStructure

Name	Type	Notes
Provider	<u>ProviderDetail</u>	

5.18.ProviderDetail

This is a sub-class of [ProviderInfo](#) and so also includes all its fields.

Name	Type	Notes
ProviderAddress	AddressType	
Website	String	The provider's website address
Email	String	The provider's email address
Phone	String	The provider's telephone number
Fax	String	The provider's fax number

5.19.ProviderDetailsOutput

Name	Type	Notes
ProviderDetails	ProviderDetail	
RequestDetails	ProviderDetailsRequestStructure	

5.20.ProviderDetailsRequestStructure

Name	Type	Notes
ProviderID	Integer	

5.21.CourseDetailOutput

Name	Type	Notes
RequestDetails	CourseDetailRequestStructure	
CourseDetails	CourseDetailStructure	

5.22.CourseDetailRequestStructure

Name	Type	Notes
CourseID	Integer	

5.23. CourseDetailStructure

Name	Type	Notes
Provider	ProviderDetail	
Course	CourseDetail	
Opportunity	OpportunityDetail	This will appear once per opportunity
Venue	VenueDetail	This will appear once per venue

5.24. CourseDetail

This is a sub-class of [CourseInfo](#) and so also includes all of its fields.

Name	Type	Notes
AwardingBody	String	
EntryRequirements	String	
AssessmentMethod	String	
EquipmentRequired	String	
URL	String	URL for the details of the course on the provider's own website
BookingURL	String	URL for the page to enrol on the course on the provider's own website
TariffRequired	String	
LADID	String	Learning aim reference from LARS
QualificationReferenceAuthority	String	
QualificationReference	String	
QualificationTitle	String	
Level2EntitlementCategoryDesc	String	
Level3EntitlementCategoryDesc	String	
SectorLeadBodyDesc	String	
AccreditationStartDate	String	
AccreditationEndDate	String	
CertificationEndDate	String	

CreditValue	String
QCAGuidedLearningHours	String
IndependentLivingSkills	String
SkillsForLifeFlag	String
ERAppStatus	String
ERTTGStatus	String
AdultLRStatus	String
OtherFundingNonFundedStatus	String

5.25. OpportunityDetail

Name	Type	Notes
OpportunityId	Integer	The ID of the opportunity
ProviderOpportunityId	String	Provider's own identifier for opportunity
Price	String	Price for opportunity
PriceDesc	String	
StartDate	StartDateType	
EndDate	String	End date of the opportunity in the format DD MMMM YYYY (e.g. 01 September 2017)
Duration	DurationType	
StudyMode	String	Description of study mode. See Study Modes
AttendanceMode	String	Description of attendance mode. See Attendance Modes
AttendancePattern	String	Description of attendance pattern. See Attendance Patterns
Timetable	String	
LanguageOfAssessment	String	
LanguageOfInstruction	String	
PlacesAvailable	Integer	Total number of places available
EnquireTo	String	
ApplyTo	String	
ApplyFromDate	String	In the format DD-MMM-YY (e.g. 31-May-2017)
ApplyUntilDate	String	In the format YYYYMMDD HH:MM:SS (e.g. 20170831 00:00:00. The time element will always contain 00:00:00)
ApplyUntilDesc	String	
URL	String	
A10	Array of Strings	See A10 Funding Codes

¹ VenueID	Integer	The Id of the Venue
¹ RegionName	String	This will contain the name of the region in which the opportunity takes place.
ApplicationAcceptedThroughoutTheYear	String	Y or N

5.26. VenueDetail

Name	Type	Notes
VenueID	Integer	The ID of the venue
VenueName	String	
VenueAddress	AddressType	
Website	String	Website for the venue
Email	String	Email address for the venue
Phone	String	Telephone number for the venue
Fax	String	Fax number for the venue
Facilities	String	Facilities available at the venue

5.27. SubjectBrowseOutput

Name	Type	Notes
Level1	Level1	This will appear once for each level 1 LDCS code

5.28. Level1

Name	Type	Notes
LDCS	LDCSInfoType	
Level2	Level2	This will appear once for each level 2 LDCS code
CourseCounts	Integer	Number of courses for this LDCS code

¹ If using .NET the values for the VenueID & RegionName properties will be inside the Items property. Look in the ItemsElementName property to see which index in the Items array refers to VenueID and which index refers to RegionName.

5.29.Level2

Name	Type	Notes
LDCS	LDCSInfoType	
Level3	CategoryInfo	This will appear once for each level 3 LDCS code
CourseCounts	Integer	Number of courses for this LDCS code

5.30.CategoryInfo

Name	Type	Notes
LDCS	LDCSInfoType	
CourseCounts	Integer	Number of courses for this LDCS code

6. Lookups

6.1. Duration Units

Code	Description
DU1	Hour(s)
DU2	Day(s)
DU3	Week(s)
DU4	Month(s)
DU5	Term(s)
DU6	Semester(s)
DU7	Year(s)

6.2. Qualification Types

Code	Description
QT1	No qualification
QT2	Certificate of attendance
QT3	Functional skill
QT4	Basic/key skill
QT5	Course provider certificate (this must include an assessed element)
QT6	External awarded qualification - Non-accredited
QT7	Other regulated/accredited qualification
QT8	GCSE or equivalent
QT9	14-19 Diploma and relevant components
QT10	Apprenticeship
QT11	NVQ and relevant components
QT12	International Baccalaureate diploma
QT13	GCE A/AS Level or equivalent
QT14	Access to higher education
QT15	HNC/HND/Higher education awards
QT16	Foundation degree
QT17	Undergraduate qualification
QT18	Postgraduate qualification
QT19	Professional or Industry Specific Qualification

6.3. Qualification Levels

Code	Description
LV0	Entry Level
LV1	Level 1
LV2	Level 2
LV3	Level 3
LV4	Level 4
LV5	Level 5
LV6	Level 6
LV7	Level 7

LV8	Level 8
LV9	Higher Level
LVNA	Unknown/not applicable

6.4. Study Modes

Code	Description
SM1	Full time
SM2	Part time
SM3	Part of a full-time program
SM4	Flexible
SM5	Not known

6.5. Attendance Modes

Code	Description
AM1	Location / campus
AM2	Face-to-face (non-campus)
AM3	Work-based
AM4	Mixed Mode
AM5	Distance with attendance
AM6	Distance without attendance
AM7	Online without attendance
AM8	Online with attendance
AM9	Not known

6.6. Attendance Patterns

Code	Description
AP1	Daytime/working hours
AP2	Day/Block release
AP3	Evening
AP4	Twilight
AP5	Weekend
AP6	Customised
AP7	Not known
AP8	Not applicable

6.7. A10 Funding Codes

Code	Description
10	Community Learning
25	DfE EFA Funded
35	Adult Skills Funding
70	ESF funded (co-financed by the SFA)
81	Other SFA funding model – In
99	No SPA or EFA funding for this learning aim

7. API Test System Access Request

If you need help completing this form please call: Tel. 0844 811 5073 or
email: support@coursedirectoryproviderportal.org.uk

Item	API TEST SYSTEM ACCESS REQUEST
Date of Request	
Name	
Organisation	
Address	
Contact Tel	
Contact Email	
Product Name	
Product Description / url Product Overview	
INTERNAL USE ONLY	
Date of Access	
SFA Approval <i>PSMA Licence extension</i>	
Tribal Authorisation	

Send the completed form to
support@coursedirectoryproviderportal.org.uk

8. Data Consumer – Design Approval and access to the live API

This form is to be completed by the data consumer in consultation with the SFA and Tribal. The data consumer may be asked to provide additional information or a technical overview / demonstration prior to granting access to the live API.

If you need help completing this form please call: Tel. 0844 811 5073 or
email: support@coursedirectoryproviderportal.org.uk
